## **IBAC Releases New Guide on Carbon Emission Trading Systems & CORSIA for Business Aircraft Operators**

**Free Webinar June 26 – Carbon Emissions Regulations in Business Aviation – Introduction to EU, Swiss, UK ETS and ICAO’s CORSIA**

**EBACE 2024 – Geneva** - The International Business Aviation Council (IBAC) announced the release of its new guide, [Aiming For ETS & CORSIA Compliance](#), this week at the European Business Aviation Conference and Exhibition (EBACE) 2024. The IBAC Guide provides insight into complying with the EU Emissions Trading Scheme, its Swiss and UK counterparts and the Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA), introduced by the International Civil Aviation Organization (ICAO). Additionally, IBAC has scheduled a free webinar on June 26<sup>th</sup> to review highlights from this guide and share insight with business aircraft operators on determining to what extent an organization’s operations may be subject to any of these schemes.

Capt. Claude Hurley, FRAeS, IBAC Director, Environment & Flight Operations, underlines the importance of the new guide, stating, “ETS and CORSIA requirements are complex and still evolving. Our goal with this guide was to help business aircraft operators gain a better understanding of the potential impact of these schemes on their flight operations. We are fortunate to have worked with renowned subject matter expert, Martina Becher, to develop this first of its kind ETS and CORSIA Guide for the bizav community.”

Martina Becher, ETS & More Consultant stated, “It has been a pleasure working with Claude and the IBAC team on this project. Having been involved in ETS compliance since 2009, observing the continuous increase of complexity linked to those regulations, we have strived to filter all the relevant information into one concise guidance document to serve as main reference for aircraft operators globally. Given the evolving nature of these regulatory efforts, a document of this size can’t fully cover all aspects, however, it will help operators determine what to consider regarding these schemes and provide useful links to additional information and contact details for further advice. The guide and webinar will also provide a foundation and understanding of the requirements when working with third-party organizations that can assist with compliance.”

“We are excited to share this guide with the business aviation industry and look forward to hosting the webinar later in June. My appreciation goes to Claude and Martina for their hard work putting this valuable document together. This resource will provide operators significant insight to these out-of-sector measures implemented by States as part of the range of tools to help aviation reduce carbon emissions,” commented Kurt Edwards, Director General, IBAC.

The one-hour complimentary webinar, *Carbon Emissions Regulations in Business Aviation: IBAC’s Guidance and Introduction to EU, Swiss, & UK ETS and ICAO’s CORSIA* is open for registration [HERE](#). The IBAC ETS & CORSIA Compliance Guide is available for preview and download at [ETS-CORSIA Guide](#).

### **About International Business Aviation Council (IBAC)**

IBAC represents the interests of business aviation worldwide. IBAC is a non-profit, international trade association with official observer status at the International Civil Aviation Organization, the UN Specialized Agency for aviation matters, in Montreal, Canada. IBAC promotes and manages the industry-leading standards for best safety practices through its International Standard for Business Aircraft Operations (IS-BAO™); International Standard for Business Aviation Handling (IS-BAH™); Safety Management Tool Kit; SMS eLearning training; and Crew Card. Recently introduced in partnership with CTX, the IBAC Carbon Credit Exchange provides the business aviation community with a reliable resource for real-time offsetting to reduce its carbon footprint.
